

A Measure Above The Rest

Medical Traineeship *Physiology*

MSc & PhD Scholarships (MD also available)

Leonardo Da Vinci's 'Vitruvian Man' is a recognised symbol of the symmetry inherent in the universe. The canon of proportions puts our world in context with a concept which began with Protagoras' declaration that "man is the measure of all things". At UCD we provide the right fit for Medical Trainees.

The research focus in Physiology at UCD currently involves but is not limited to:

- Human Cells and Tissues (Cellular Physiology)
- Endocrine Physiology
- Cardiovascular and Respiratory Physiology
- Experimental Physiology
- Renal Physiology

The one year (or possible extension for the duration of research degree) full-time scholarship programme offers an **€18,000 tax free stipend** along with payment of **100% of EU student fees covered**. Successful candidates will undertake a graduate taught or research degree programme and gain experience teaching in small groups along with adding to their research portfolio. Strong academic skills and competency in Physiology are desirable as part of the selection criteria, along with clinical training and proficient communication skills.

Selection criteria:

Good working knowledge of Biology/Physiology

BSc (2.1 or higher desirable)

Proven communication skills

APPLICATIONS for September 2019/20
